Suitable surfaces:

Plaster, plasterboards, bricks, concrete, concrete blocks (cinderblock), plastered surfaces.
The support must be stable, dry and in good conditions, always protected against infiltrations.
Other: contact us.
Exceptions: installation on floors, ceilings, humid places, exposed directly to bad weather or temperatures above 50°C.

Product storage

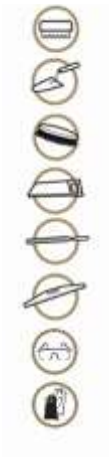

Inside, protected against moisture and extreme temperatures.

Installation instructions

1.Draw a line to ensure the alignment of the veneers. Choose the veneers.
2.Plane the edges and scratch the back of the veneers.
3.Apply the glue (Modulo Colle).
4.Apply the veneers to the wall.
5.Cut the veneers if necessary.
6.Apply the Modulo Protection Spray.

Tools needed

Maintenance

1. Use only neutral PH cleaning solutions to clean the veneers.
2. Protect your veneers with Modulo Protection Spray after installation to facilitate maintenance.
3. Clean the veneers with a vacuum cleaner, making sure that the nozzle does not come into direct contact with the veneers.
4. Do not clean the veneers using high pressure.
5. In case of deeply imprinted stains, consult a professional. Pay attention to nonspecific cleaning products.
